

BAR STOOL NOBU

Nobu is a stool in the typical industrial design and looks like he is coming directly out of a workshop. The solid frame is made of black, powder-coated steel combined with a seat made of walnut-stained ash wood. The visible spindle is a real eye-catcher and height-adjustable. The seat height can thus be adjusted from 65.5 centimetres to up to 85.5 centimetres. The seat diameter is 33,5 centimetres.

- height adjustable
- Ergonomically shaped, solid wooden seat
- Robust, solid steel frame
